PROFESSIONAL SUMMARY

Linguistics B.A. and Computer Science candidate at UC Santa Cruz building Python backend pipelines and production AI tooling. Adapted and deployed a Claude-based AI agent across 4 Stanford course sections to several hundred users in production Python. Built REST APIs and JSON data pipelines using Python.

EDUCATION

University of California, Santa Cruz Santa Cruz, CA

Computer Science Minor, Linguistics B.A. *Expected Graduation: Winter 2027*

Relevant Coursework: CSE 40: Machine Learning in Python, CSE 101: Data Structures and Algorithms, CSE 101M: Mathematical Thinking for CS, CSE 150: Introduction to Computer Networks, CSE 151: Advanced Computer Networks, CSE 180: Database Systems

EXPERIENCE

Software Engineer Intern Jul 2026 – Sep 2026

treemarks.ai *Stanford, CA*

- Built and shipped core features for a Claude-based grading agent supporting real-time grading operations, Gradescope/Canvas API access to course materials, and detailed agent feedback, including test gates in the MVP that checked for sufficient input documents and generated format-friendly guidelines, plus formatting-fidelity checks against manually annotated feedback from prior runs.

Intern Contributor, Tech Beat Dec 2025 – May 2026

The American Prospect *Santa Cruz, CA*

- Authored a published article on the impact of AI on entry-level job opportunities; conducted technical research, fact-checking, and data analysis on emerging AI technologies.

Content Analytics Intern Jun 2024 – Jan 2025

Paystand *Santa Cruz, CA*

- Measured platform performance data across TikTok, YouTube, and Twitter, resulting in a gain of 10,000 subscribers from 100 within 3 months.

PROJECTS

Don't Die Oct 2026 – Present

Developer

- A ROBLOX-based version of Far Cry 5, currently in development.

NGramLM Aug 2026 – Sep 2026

Personal Project

- Built an N-gram language model in Python that ingests articles from the Wikipedia API or local corpus documents and generates context-related text output.

SpotiLytics Jun 2026 – Aug 2026

Data Engineer

- Built a REST API and JSON data pipeline using Python (Flask and SpotiPy) to collect Spotify listening data; investigating whether listening behavior varies by day of the week.

ACTIVITIES & LEADERSHIP

Math, Engineering & Science Achievement Program (MESA) Feb 2025 - Present

Member

- Peer and staff-led STEM program at UC Santa Cruz supporting underrepresented first-generation college students.

Society of Hispanic Professional Engineers (SHPE) Sep 2025 - Jun 2026

Member

- Professional engineering society for students from Hispanic backgrounds, affiliated with NSBE and MESA chapters.

SKILLS

Data & Tools: REST APIs, JSON pipelines, Flask, SpotiPy

Programming Languages: Python, C, SQL

Research: Language Models, Psycholinguistics, Neurolinguistics

Languages: English, Vietnamese, Japanese
